

Schools and Community

The Republicans are behind school choice, and I will explain how this is wrong and we have the solution. It is very simple, what needs to be done for our schools and our communities.

I think schools and community are all tied together, they both need to thrive if we want what is best for all who are involved.

It is important to look at a community as a circle with the schools, businesses, and people who are like a family who have concern for all who are involved.

The Republicans want to push school choice and the democrats are in bed with the teacher's union. They are both wrong and I will explain, what needs to be done.

What happens with school choice is, I'll use the STL Suburbs as an example. The parents in the Hazelwood school district are not happy with the grades of their children and they blame the teachers. They are also concerned with all the violence and lack of discipline.

Each parent decides they want to bus their children, many miles to other schools that have very little violence, and the students are learning. This seems like a good idea to Republicans and the parents in these bad schools.

What happens is the students in Hazelwood may choose to go to 7-8 different schools. You have the long bus rides and what happens to the students who are left? Just think about the cost of transportation. The students have long bus rides, and they need to get up earlier and they get home later.

They lose time for studying and how about after school activities, and the cost of the taxis to get them home. Also having a school far away

takes many parents out of being involved with the school. They also lose a lot of important family time, with the long bus rides.

When this happens, you lose the sense of community, and everybody loses! I can't express enough the importance of Community, Fathers, Family, and Men.

The democrats are for neighborhood schools because of the teacher's union, and neither of them give a darn about the children getting a good education. The democrats only concern and the teachers feel the same is to indoctrinate our children with the far-left agenda.

There is some sick stuff being taught in our grade schools! I am talking about sex talk with young children, which is not appropriate, and we will put a stop to it! They are having men dressed as women in our classrooms, trying to normalize it with our young people. The culture promoted in our schools is not what our schools are supposed to be doing. Our young people are being indoctrinated by a culture that says everything goes, and there is no wrong!

We will have Billboards in communities on school issues, that can be used nationwide. They will hit on Woke issues that are being taught instead of educating our youth, they are indoctrinating them.

As time goes, we will have many active people and growing all the time to raise some controlled Hell when it is needed. We will be going after the school boards, administrators, and teachers, with protests and conversations.

We need to build strong communities across America, when that happens the schools become stronger and better. It is imperative for businesses to be involved with the schools by advertising, posting athletic schedules, and to donating time.

It is a must to increase the men teachers in our schools, the urban schools are in dire need of role models who are men who can instill some discipline, fun, and guidance.

I would also love to see male volunteers who put some time in at the schools talking to students and encouraging them to be the best they can be, having fun and being cheerful.

It is a must to pay our teachers more, and it can be done by cutting the budgets on many federal programs and eliminating departments! It is a must for local, state, and federal budgets to have zero base budgeting.

We want teachers to have a passion for their field and concern for their students. They need to show enthusiasm, ability, and a desire for each student to be the best they can be in class and life. Stress the work hard ethic and goal setting for all students. It is important to be a very good role model for the students and the community. Also expect proper manners and teachers should watch their mouths around campus.

If a teacher sees a student falling behind, not paying attention, or should be doing better, a parent needs to be contacted. The teacher may suggest the student get extra help after school or a tutor. The parents, student, counselor, and teacher are a circle, and they need to work together. Motivation needs to be used by this circle, and compliments when a job is well done. This will take hard work from all involved, but the reward will be tremendous.

It is very important to have teachers trained with guns, only the qualified and they must go through rigorous and continuous training! Why not have them go through some of the same training as police officers? They will need to be in shape physically and to be totally

committed to being a teacher and a person who will act when called on. They also need to be able to get physical and stop altercations, on the school grounds. They will also have stun guns in their possession, to use against the unruly.

I am tired of all the talk and no action at our schools, we must secure our schools, without making them like a prison. Our schools need to be safe for learning and to also keep the Evil out and if they enter, they will be stymied!

These specialty teachers will make extra money and they will be a dedicated bunch who will have respect in our schools and will be motivators. Our counselors will also be eligible to be these special people.

Not all young people are interested in upper education, the trades are an excellent alternative and there are many opportunities for an excellent career and good money. There is a huge demand and many well-paying jobs for those who want to go in this direction!

Parents need to get a lot more active on many fronts! The liberal indoctrination needs to be stopped yesterday and go back to educating our young people and concentrating on preparing our young people for life.

There is a lack of parents showing up at parent teachers conferences, this really bothers me to the maximum! I always showed up and I talked personally to all my kids' teachers, I wanted to hear what was going on with my children. Both of my kids felt they didn't want to disappoint Peg or I with anything in athletics or academics.

Here is a solution, it will take a little work from parents and teachers. We always had a certain evening where parents could come to the school for the 3rd graders and the next evening for the 4th graders. I

understand some parents can't make it, then there is a need to schedule an individual meeting with a teacher.

How do we encourage a parent to get active in their Childs education, you ask? This is very simple, offer the student extra credit to have a parent show up for a conference. The student then should encourage their parents to get to the school.

There can also be a marketing plan to get parents to the school and this could get local businesses involved!

School Counselors are very important, and they need to wear many hats. We need to have more counselors who are involved and care about everybody in their circle. They will be the ringleader and very involved with each of their circles. We will need to hire many more counselors, and an increase in pay!

CRT and the Woke views by the Socialist Democrat Party is detrimental to our students and our country. It is all just more hate coming from the socialist, it teaches there are oppressors and those who are oppressed. Many of us are tired of the poor me attitude that is taking over our country and this falls directly into the lap of Academia and the democrat party.

Violence and discipline is a huge problem in our large cities and it is getting worse, and a lot of the blame goes to the democrat party and their partner the teachers union. They both are all about control and more power for themselves! They are concerned with CRT, Wokeness, and fooling Americans! We will be hitting them hard and exposing their anti-American views for all to see.

We are recommending for all students to take field trips to a prison in their state and to see what happens if they take the wrong path. They will see the worse of worse and hear some rough language. The idea

of this is to scare the Hell out of them! It is imperative to take an entire quarter and study crime, drugs, out of wedlock babies, and with lots of motivation to be the best they can be! I call this tough love and it will help a great deal with discipline.

Some schools have a zero tolerance on discipline, this makes no sense at all. They do this so they can take the easy way out, and to not have to make a decision. Here is an example: A known troublemaker picks a fight with a fellow student, he doesn't want to rumble, but the jerk keeps on him with name calling and shoves. The innocent guy decides to get after it, they start to fight and hopefully he slaps the Hell out of him!

The fight gets broken up and they go to the principal's office and instead of investigating he gives both boys a 3-day suspension. This example happened at my sons' school, and it really bothered me to the maximum.

I always taught my son to never start a fight, but if the jerk persists in name calling and shoving, beat the Hell out of him. If he gets a 3-day suspension, I would visit the principal and get his story and ask him why my son received a 3-day suspension? He would say they have a zero-tolerance program and there is nothing I can do about it.

I would then firmly say, what would you do if I grabbed you and started pushing and threatening you, wouldn't you defend yourself? I certainly would fight back, well that is what my son did, how come you can defend yourself and my son can't? This is exactly what I said to my son if he was in the same situation.

America has a drug problem and what needs to be done is have ex drug abusers tell their story at an assembly. They need to go into detail, about how it has messed up their lives, and the affect it had on others.

There needs to be an assembly with speakers from the local police department. They will discuss what they have seen on the street and what it takes to be a productive citizen in our country. They can also talk about a career in law enforcement, and what it takes to get involved. We can also include Firemen and EMT Workers in an assembly.

I think we need a strong Big Brother – Big Sister Program in our schools! This will go a long way in helping a lot of young people with good role models.

Our Big City Schools need to do all of this to the maximum, or they will keep going down the drain along with the community! This is a huge concern of mine as we go forward, I will have a lot to say on this subject. We can't keep moving in the direction we are going; it will get a lot worse if all we do is gripe and spin wheels!

Conservative Wisdom United will be leading in Motivation of Americans and that will include from young people to senior citizens! It is time for all Americans to get off the porch for our families and country!

Summary

Friends, the Socialist Democrat Party is winning, because the Republicans have been weak for a long time! Many of our schools are a mess and many communities are crime ridden and a disgrace.

We have allowed the democrats to rule for a long time, that will stop, they will be exposed and defeated! We must win for our children and grandchildren!
